

Questions Concerning Healthy Neighborhoods in San Mateo County

...

A local community presentation

Based on Data from San Mateo County Open Data

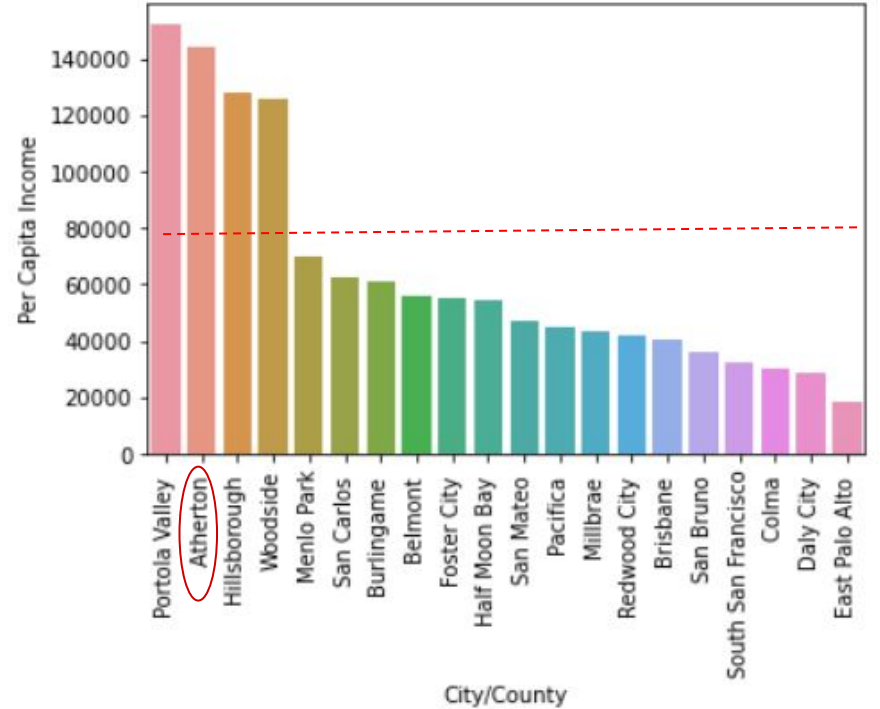

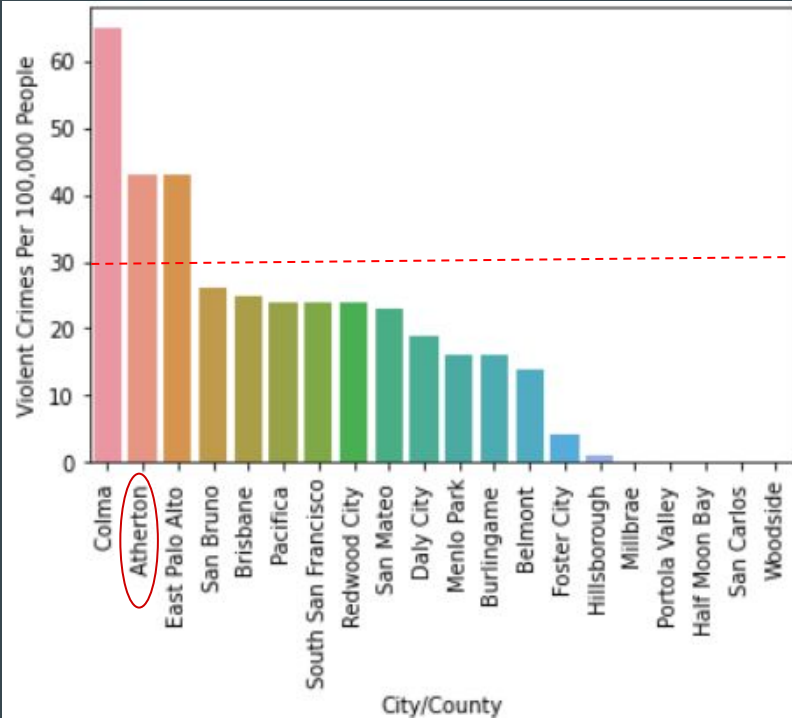

<https://data.smcgov.org/>

Questions to answer:

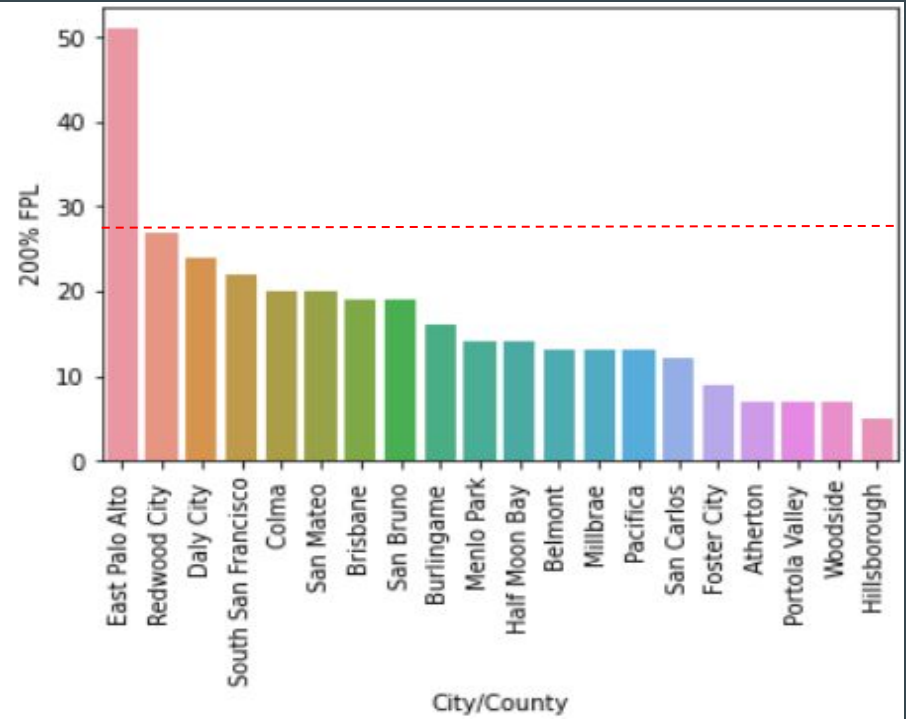

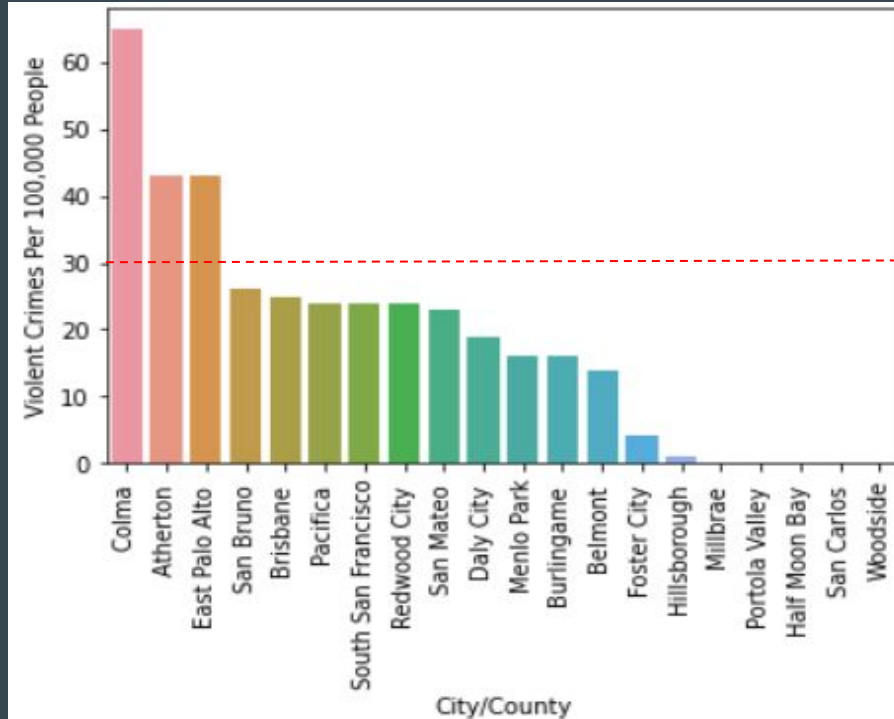

Do Wealthy Neighborhoods in San Mateo County Have Less Violent Crime?

Do Poorer Neighborhoods in San Mateo County Result in Longer Commutes?

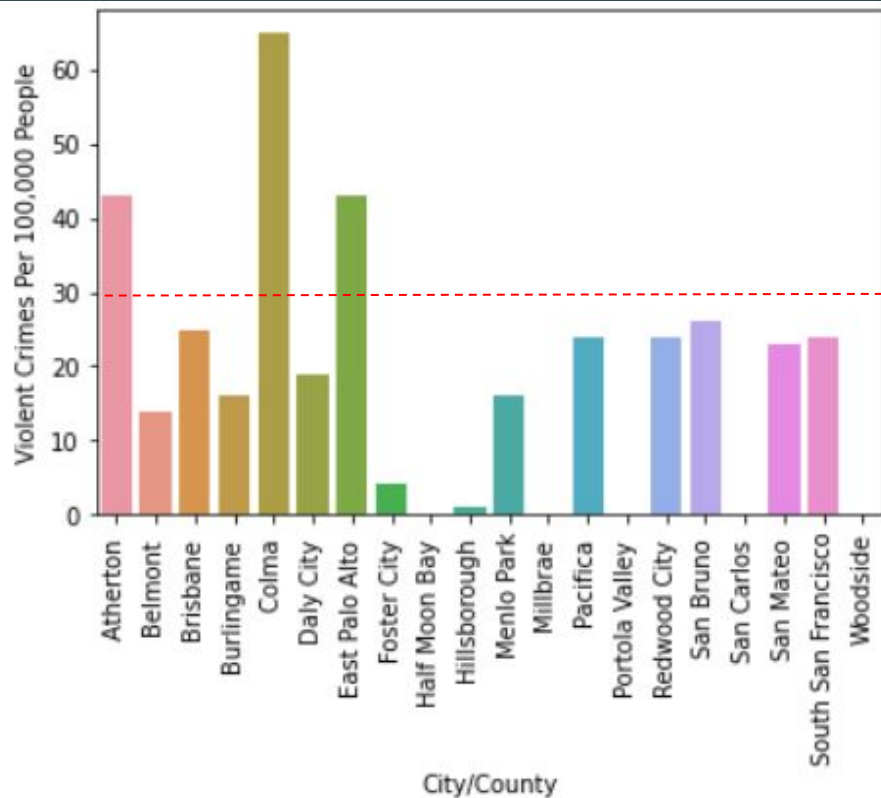

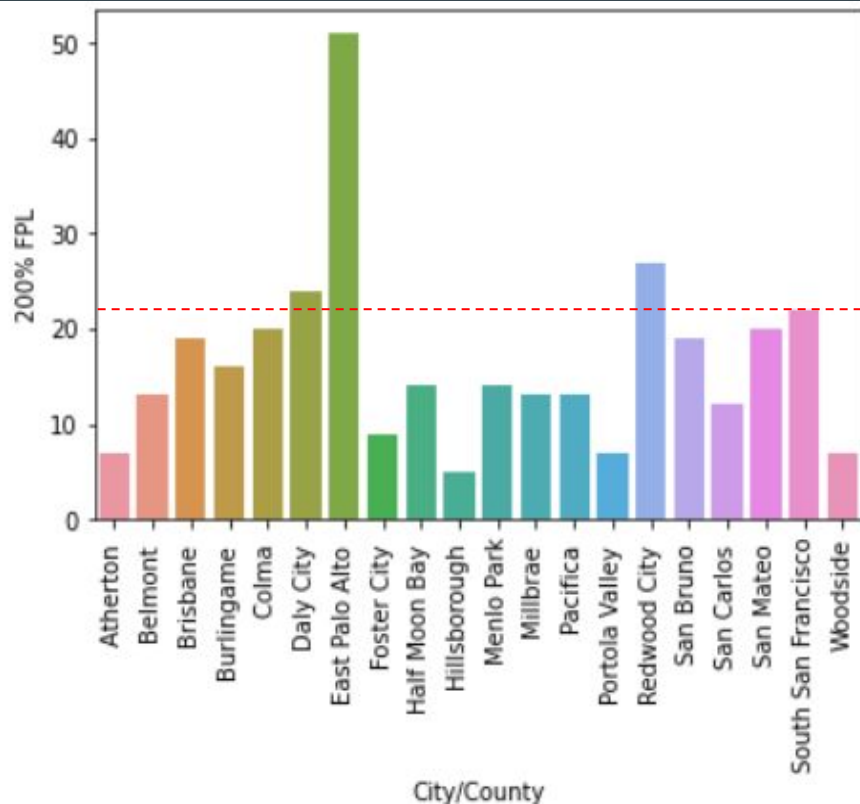

Violent Crimes vs. Per Capita Income

Violent Crimes vs. Percent Below Poverty Level

Top 3 Cities by Poverty Level and Violent Crime

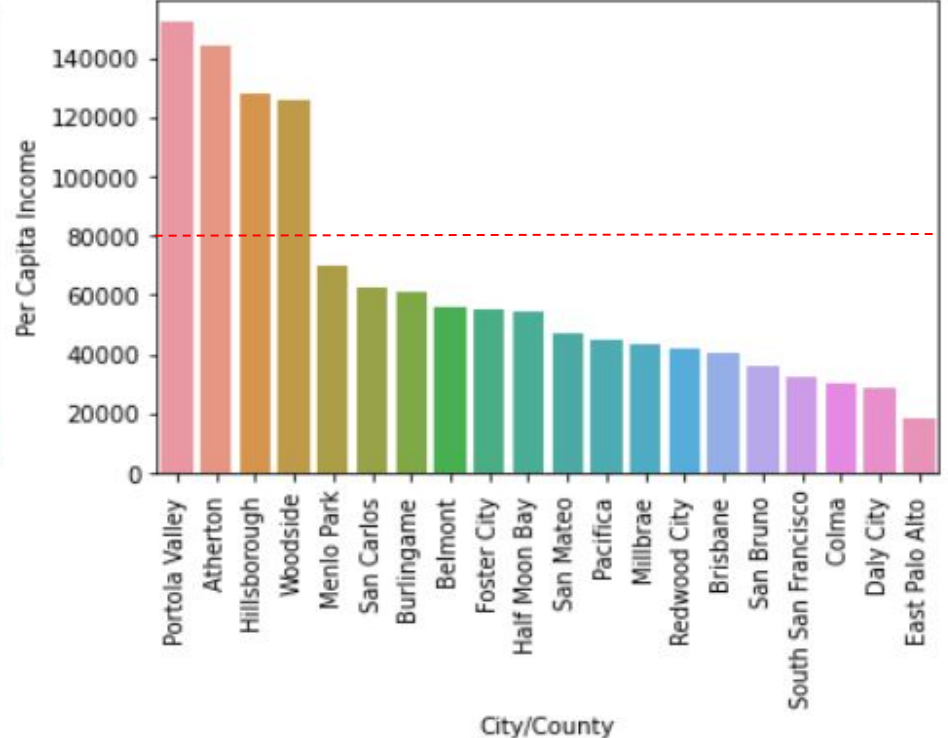

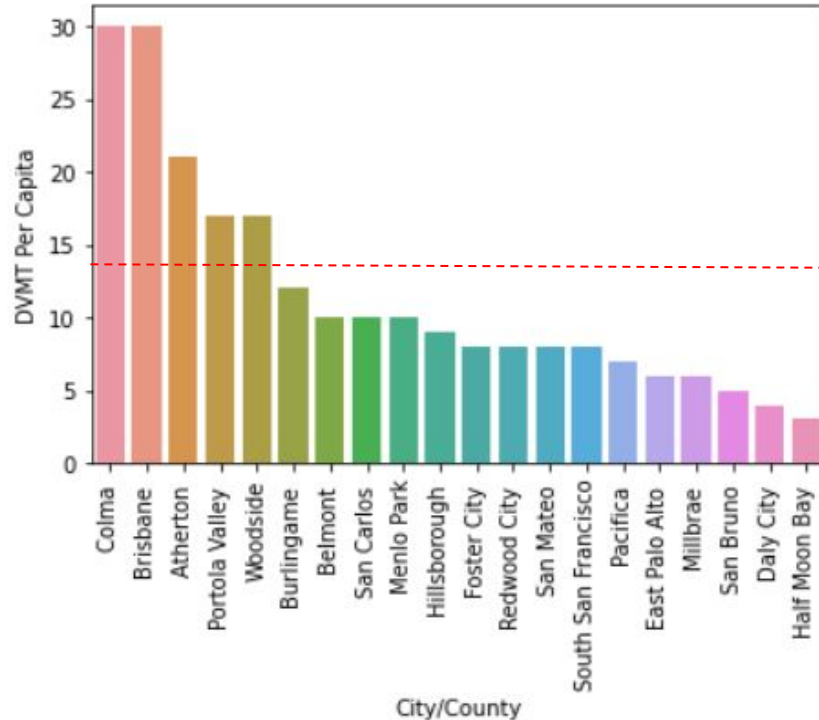

Do Wealthy Neighborhoods in San Mateo County Have Less Violent Crime?

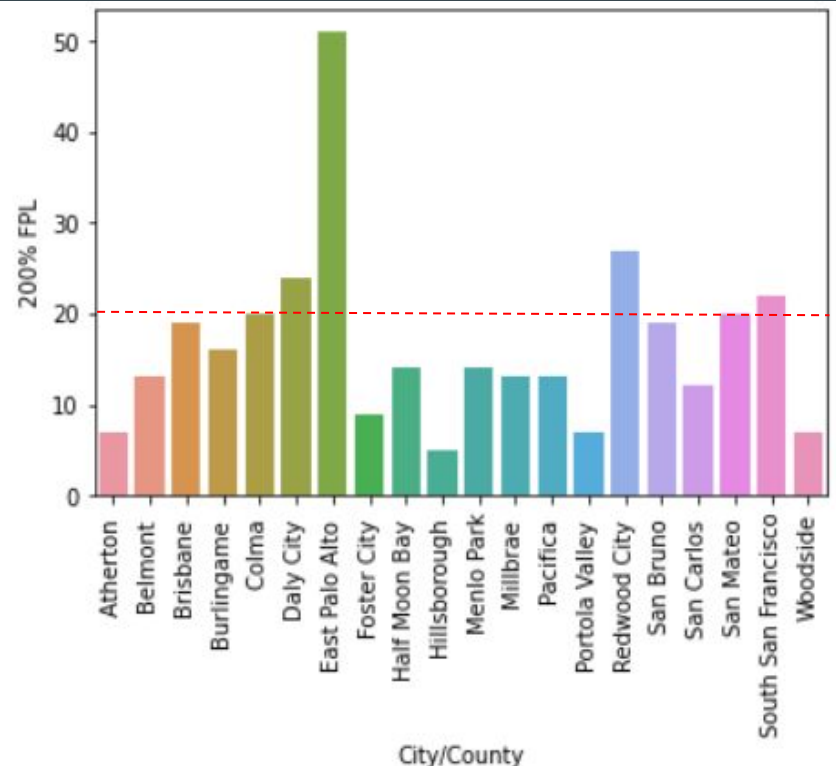

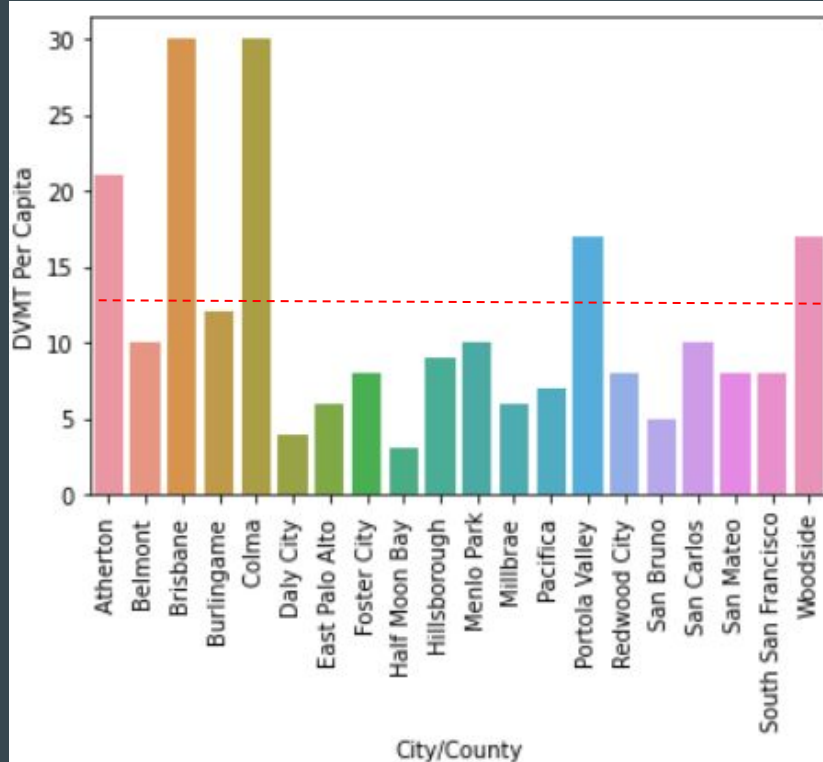

While some wealthier cities have less violent crime, this is not true across the board.

There are other factors not present in the “Healthy County” data that correlate with violent crime.

Daily Miles Driven vs. Per Capita Income

Top Five Miles Driven vs. Below Poverty Level

Do Poorer Neighborhoods in San Mateo County Result in Longer Commutes?

Three Cities are in the top four in both income and commute miles.

Atherton, Portola Valley, Woodside,

Colma and Brisbane have the longest commutes, but are in the bottom 6 by per capita income

Again, there must be other factors not present in the “Healthy County” data that correlate with commute distance
